

4G/5G as Key Enabler for einfrastructure Development.

Todor Tashev Senior Director Network and Services Area A1 BG

America Movil – Major Shareholder in A1 Group

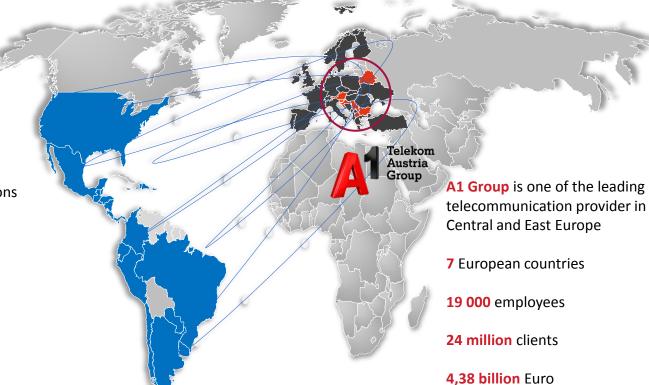

25 Countries

in America and Europe

362 Millions

connected lines:

- o 279 million mobile clients
- 82,8 million fixed subscriptions (internet and TV)

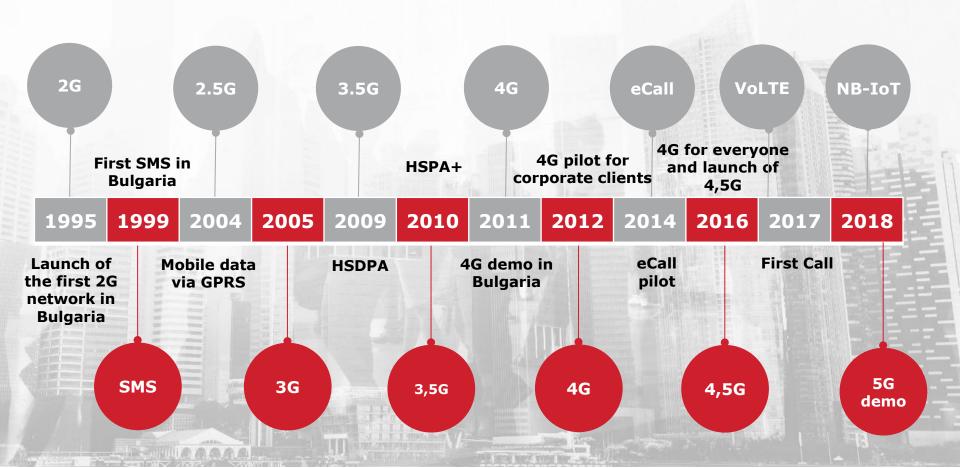

A1 BG- Technology Leader

Implemented Technologies Leading to Better Customer Experience

Fixed-mobile Substitution

- Netbox
- FastMile solution-Dedicated user throughput in LTE networks

M₂M

- POS terminals
- ATM machines
- Security
- Sensor data

Real Time Tracking of People, Pets, Vehicles and Goods

NB-IoT Benefits

Improved coverage
Up to 20 dB

Reduced energy consumption to reach 10 years battery lifetime

Reduced device price

Reduced device complexity

Avoid impact to existing systems

GSM WCDMA

LTE

Support massive number of devices

Possible to deliver UL exception report in 10s

Operate in narrow Spectrum

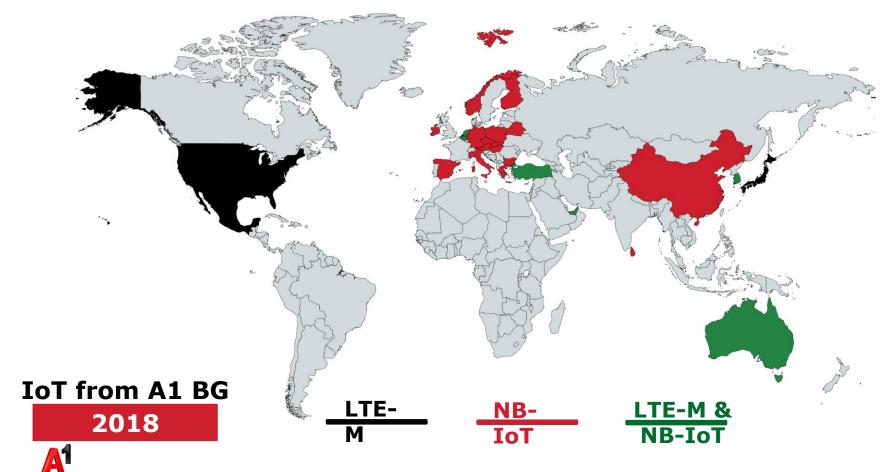

NB-IoT is A1 BG Choice of Technology

Why Narrow Band IoT			
	NB IoT	LoRa	Sigfox
Low Device Cost			
Extended battery life			
Deep Indoor Coverage			
Bandwidth			
2 Way Communication			
3GPP Standards Based			
Performance/Latency			
Licenced Spectrum			
Cellular Security			
Quality od Service			

IoT Deployments in Mobile Networks

IoT in 2025

North America

5,9 billions

South America

NB-IoT Use Cases

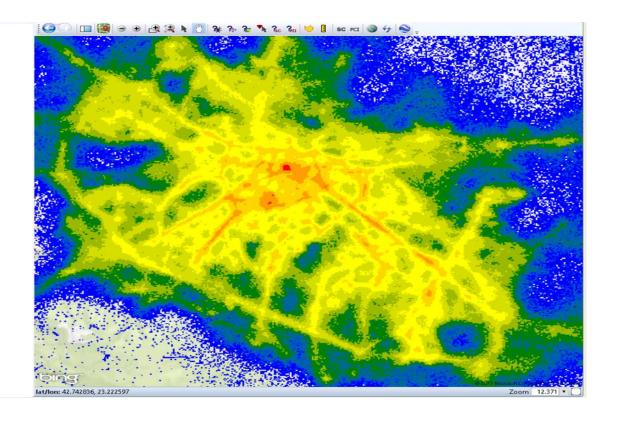

Mobility Insights Use Cases

- ☐ Find the most suitable place for an office/ATM?
- Why office X is visited so rarely in the last days?
- Where our clients come from?
- How long they stay with us?
- □ Have they been with our competitors before visiting us?
- Where do they go after?
- ☐ Is there anyone who passes by?
- Are there any foreigners and from which country they are?

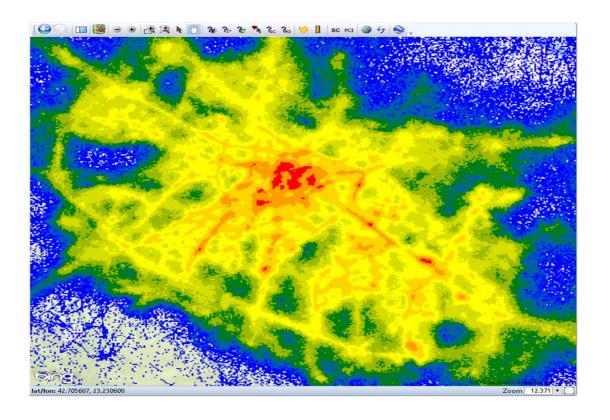

What is My Customer Distribution in Sofia between 07h – 09h?

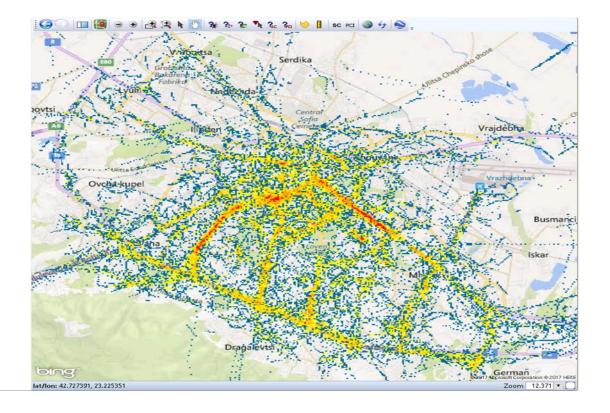

What is My Customer Distribution in Sofia between 14h – 16h?

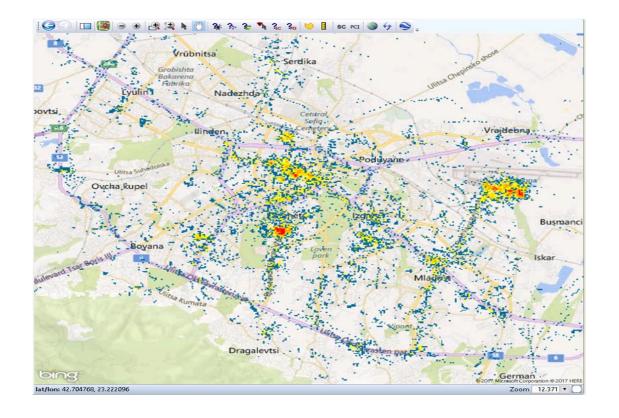

Where iPhones 7 pass by from 08h-09h

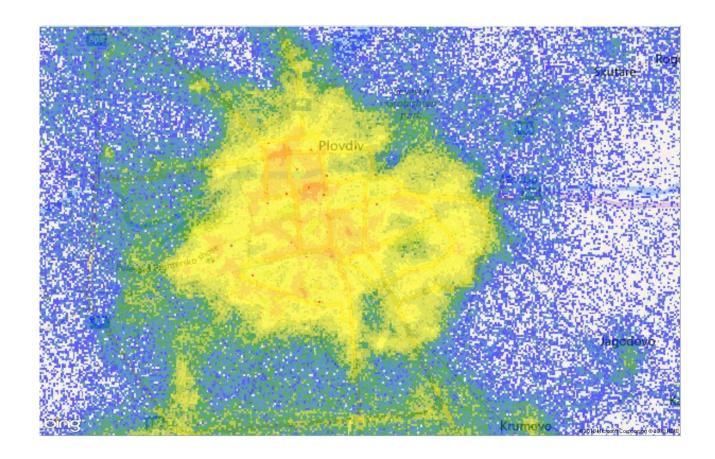

Which are the hot spots visited by foreigners in the morning

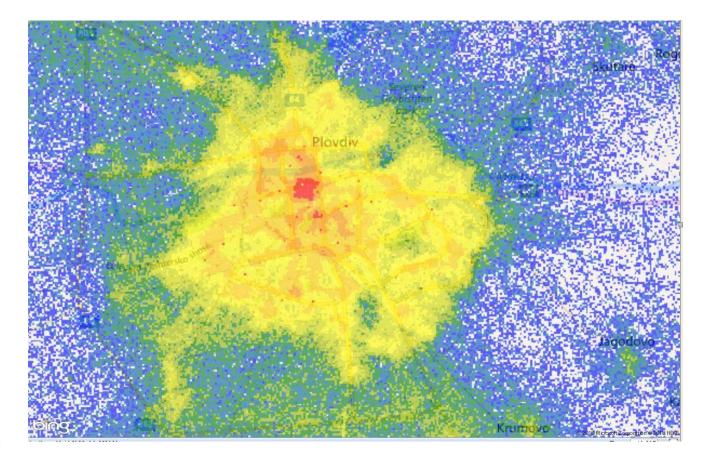

What is My Customer Distribution in Plovdiv between 07h – 09h?

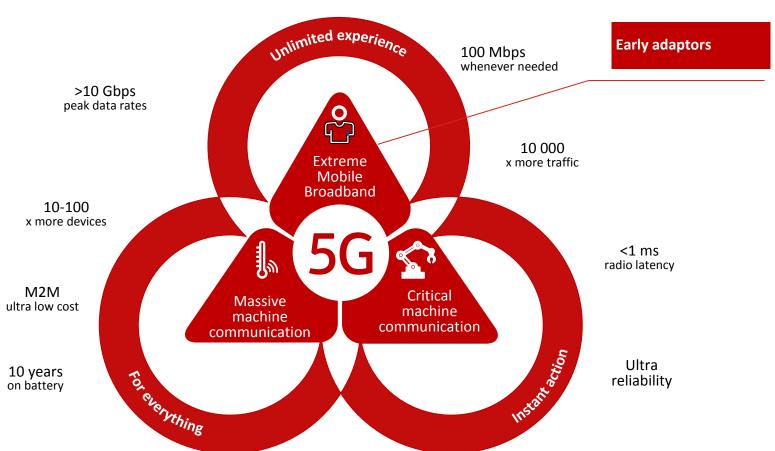

What is My Customer Distribution in Plovdiv between 14h – 16h?

Market Drivers for 5G

Main Streams for 5G Implementation

BROADBAND EXPERIENCE EVERYWHERE, ANYTIME

Broadband access in crowded areas, Broadband access in public transport, Event platform

SMART VEHICLES, TRANSPORT & INFRASTRUCTURE

Smart infrastructures, Connected bus-stops, Connected trucks, Connected cars

MEDIA EVERYWHERE

Live TV at scale, On-demand anything, Mobile for In-home TV, Accelerating emerging markets, Ultimate video quality anywhere – 4K, 8K, HDR, HFR

CRITICAL CONTROL OF REMOTE DEVICES

Remote control of heavy machineries, Factory automation, Real-time monitoring of plant / process conditions, Smart grids, Remote surgery

INTERACTION HUMAN-IOT

Immersive augmented reality, Immersive gaming, Surveillance Tactile internet, Smart biker-helmets, Smart houses, Child monitoring, Smart shipping

Main Streams for 5G Implementation

Partial Autonomy Productivity Outage due to vehicle stoppage requiring manual intervention WiFi Connectivity **Network Enabled** Limited reliance on 4G wireless for workflow automation Digital **Transformation** Wired Sensing/Actuation Limited video availability Machine health monitoring Data collection for manual intervention

Extreme Autonomy

Minimal outage with ultra-reliable network operation; autonomous service restoration

Self-optimizing LTE/5G network without any trailer relocation

Universal 4G/5G enabled broadband connectivity for workflow automation

Massive wireless IoT (NB-IoT)

Massive on-demand video/AR/VR from vehicles, trains, drones

Health & safety for humans & machines

Digital value creation through data analytics and augmented cognition

Private Networks Enable Enterprise Transformation

Three innovative technologies that are key to the digital transformation Cloud computing , other Broadband Analytic & Cloud Automation Mobility Computing 360° Video Surveillance **Energy Management Health & Safety Autonomous Driving** Geolocation **Predictive Analytics and Control Eco-monitoring Dispatch Systems**

Customer Experience Management, Real Time analytics, end to end security and services
